Healer – Seminar

Invitation for a healing seminar organized by **ICoI Gambia/Germany and Anamed** (German NGOs)

We are grateful to be able to offer this seminar in Gambia to help the Gambians to gain knowledge about treating malaria and other diseases and plant their own medicine in their own gardens!

The following are important aspects of *anamed* seminars:

Our emphasis is on working at the grass roots, encouraging and supporting local people in developing and extending the skills they already have.

We encourage traditional healers and formal health workers such as doctors and nurses to work together. We help them to recognise the positive contribution that each of them makes, and we encourage them to work out practical ways in which they can cooperate.

By introducing *Artemisia annua*, we want to enable healers, pastors, missionaries and health

workers to become much more independent and successful in their treatment of malaria.

After the seminar participants will be able to treat malaria effectively with medical plants in particular with *Artemisia annua*. Each participant will be given seeds and be taught how to grow this delicate but extremely valuable plant. Furthermore participants will be able to recognise at least 20 other medical plants, to produce different soaps, different medical oils and ointments, black stones for snakebites and to use and construct a solar oven, etc.

It is important that all participants commit both to practising what they learn and also to teaching others, for example by conducting a seminar themselves or at least a similar workshop for a weekend on the topic of natural medicine.

We will not cover any fees for transportation or participation!

All participants will work together in practical work. They must bring suitable clothes with them for such activities.

Participants must attend for the entire programme to qualify for a certificate; to come only on some days is not acceptable.

Those participants who have a bible should bring it. Anamed is a Christian organisation. We start every morning with a biblical reflection, each participant is invited to attend.

All participants should bring plant material of five medical plants from their region.

We are looking forward to having you on board!

Date of the Seminar

from 17th of March 2019 - evening
until 24th of March 2019 - morning
in Bwiam – Kampant

Tutors

Sol Victor and Karin Maus, anamed Senegal
